# Swift Dart

## What you need:

- Coloured pencils
- Scissors
- Two straws – one larger than the other
- Sticky tape
- Paper clip

## How to make your swift fly

- First, colour the bird, as suggested on the colouring guide.
- Cut around the outline of the bird and turn it over.
- Cover one end of the large straw with tape and stick it to the back where shown.
- Put the paper clip on the beak.
- Now put the small straw inside the large straw and blow.
- Your swift should fly through the air!

**Speedsters:** Swifts have long, narrow wings. This means they can fly very fast, chasing insects in the sky.
